# Installation Instruction

## Rear window heater kit

NA0-7851

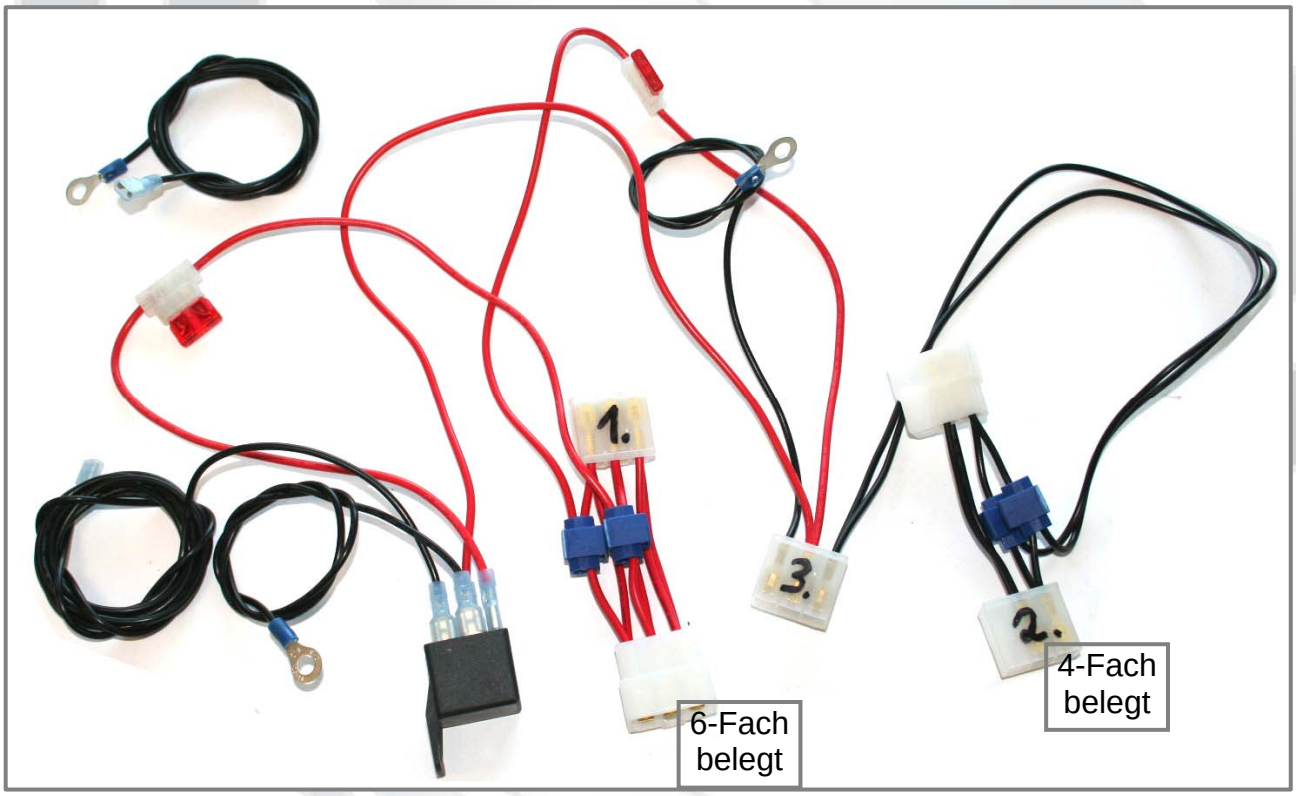

Connector 1 is positioned between ignition key & lock and wiring loom to the ignition key & lock unit.

Connector 2 is positioned between the rear foglamp switch and the connector for the rear fog lamp switch.

Connector 3 is positioned on the rear window heating switch.

The ground connections can be connected to the free threaded M6 hole on the ignition lock & key unit.

Install the long wiring loom under the door sill plate to the rear window and connect it. The seperate cable (1 meter long) is connected to the rear window and connected to the chassis of the car.
